Training students in digital skills

iTalentgardens is a unique space for fostering innovation. An outcrop of BTN Digital, iTalent was conceived to cater to the growing needs of the fast-evolving tech eco system. The services we offer are; an unprecedented combination of creative coworking spaces, training programs and industry-driven events to connect tech talents. Our mission is to create local, vibrant, globally connected campuses that empower digital and tech communities.

We host an ecosystem of innovators, startups, agencies, corporate labs, freelancers, investors, media companies and students, who are all united by a like-minded vision for digital innovation.

Our innovative training programs use disruptive learning approaches that put people at the centre. We deliver in-depth courses and training programs for both individuals and companies, focusing on five key areas: coding, data, marketing, design and business.

Be part of our community to connect with digital leaders and learn new technologies to build the next digital innovation
